

Supplementary Material: Electrophysiologic and sonographic findings before CPAP

		COMPLIANT PATIENTS					
Sex	Side	Electrophysiologic diagnosis	Findings in median nerve	Findings in ulnar nerve	Findings in nerves of lower extremities	Son. Diagn.	Neurol. examin.
M	nond	CTS, UNE, PNP	DML, sensory CV↓SNAP amplitude↓	motor CV↓ across sulcus, SNAP amplitude↓	Sural SNAP amplitude and sensory CV↓, Peronealand Tibial CMAP amplitude↓, Latencies of F-waves	CTS	Absent reflexes of lower extremities
M	nond	CTS	DML, sensory CV↓SNAP amplitude↓			CTS, UNE	Normal
	dom	CTS, UNE	DML, sensory CV↓SNAP amplitude↓	motor CV↓ across sulcus		CTS, UNE	
F	nond	lumbosacral radiculopathy			Sural SNAP amplitude↓, Tibial CMAP amplitude↓, Tibial F-wave latency		Normal
	dom	CTS	DML, sensory CV↓SNAP amplitude↓				
M	nond	UNE		motor CV↓ across sulcus		CTS, UNE	Normal
M	nond	UNE		motor CV↓ across sulcus		CTS, UNE	Decreased reflexes of lower extremities
M	nond			SNAP amplitude↓		CTS, UNE	Normal
M	nond		SNAP amplitude↓	SNAP amplitude↓		CTS	Normal
M	nond	UNE		motor CV↓ across sulcus			Normal
M	nond					CTS	Normal
	dom					CTS	
M	nond	lumbosacral radiculopathy			Peroneal F-wave latency	CTS	Normal
