

CALL FOR PAPERS

Advances in Interventional Cardiology 2020 – Focus Issue

Progress in Cell Therapies to Stimulate Cardiovascular Regeneration: From Bench, Through Imaging, To Bedside

Guest Editor: Piotr Musialek, MD DPhil

Associate Guest Editors: Marcin Majka, PhD – *basic research*
Artur Krzyżak, PhD – *imaging*
Wojciech Wojakowski, MD PhD – *clinical & translational studies*

Advances in Interventional Cardiology (ISSN: 1734-9338, eISSN: 1897-4295, IF 1.347) are happy to highlight the recent progress in cardiac, vascular, and myo-regeneration with its 2020 **Focus Issue**.

Manuscript submissions, covering recent advances in the areas of basic research, imaging, and translational/ clinical studies are encouraged.

The manuscript categories include the following:

- **Original papers** (up to 4000 words including no more than 40 references and 6 figures and/or tables, a maximum of 10 authors)
- **Short Communications** (up to 1500 words including no more than 15 references and 2 figures and/or tables, a maximum of 6 authors)
- **Review Papers** (up to 5000 words including no more than 70 references)

Submissions need to follow the *Journal* instructions available at https://www.termedia.pl/Journal/Postepy_w_Kardiologii_Interwencyjnej-35/For-authors

All submissions will undergo the Journal editorial and peer-review process and are subject to the standard publication pathway.

Intention to prepare a review should be consulted with the Focus Issue Editors available on pmusialek@szpitaljp2.krakow.pl, mmajka@cm-uj.krakow.pl, akrzyzak@agh.edu.pl, wwojakowski@sum.edu.pl

Published work will be fully quotable and will be disseminated through PubMed indexing.

Submissions deadline: 31 October 2020
